Salary: \$45,000 - \$55,000

Reports to: Director of Technology Services

Job Summary:

The Programmer/Analyst is responsible for developing, maintaining and supporting applications as a full stack developer. This position will be expected to apply programming standards and utilize the newest technologies with new and existing applications and systems. Some off hours work may be required.

Responsibilities:

- Analyze the business needs of the organization and create applications or scripting accordingly
- Analyze existing Property Appraiser systems and implement enhancements as needed
- Import, export and process datasets using Microsoft SQL
- Provide end user support for in-house applications and systems
Document new and existing systems and workflows

Required Qualifications:

- Intermediate experience with Object Oriented programming languages (C# or VB.NET Preferred)
- Experience with web design using ASP.NET, JavaScript, CSS and HTML5
- Experience with Microsoft SQL Server 2014 or greater to import, export and query data
- Excellent writing and communication skills

Preferred Qualifications:

- Experience creating reports using Microsoft SQL Server Reporting Services (SSRS)
- Experience with creating and maintaining SQL Server Integration Services (SSIS) packages
- Experience with PowerShell scripting
- Ability to create efficient SQL database tables, indexes, keys, views, etc.
- Basic knowledge of Python 2.7.8 or greater

Education:

- Bachelor's degree in Computer Science or related field. Sufficient experience may be accepted in lieu of a degree.

*The above is not designed to cover or contain a comprehensive listing of activities, duties or responsibilities that are required of the employee. Other duties, responsibilities and activities may change or be assigned at any time with or without notice.
